

Stimulus list: two directional groups

A4 landscape review - dimensions at 100% / Actual size

New	Previous	Family	Comparisons	2AFC pairs
Bi-directional				
1	1	Double-headed arrow	E / L / P	3
2	4	Circles at both ends	E / L / P	3
3	5	Colored end segments	E / L / P	3
4	6	Short vertical end lines	E / L / P	3
Uni-directional				
5	3	One abstract right end	E / L / P	3
6	7.1	Snake	L / P	1
7	7.2	Train	L / P	1
8	7.3	Street lamp	L / P	1

Eight families; 18 unique pairings. Each trial uses A above, B on the left and C on the right. B and C are response positions, not fixed transformation identities.

The former pentagon and rectangle series are outside this selected set. The abstract stimulus has only its right end component. Pair order in this review is fixed; left/right reversal is not included.

Measurements and layout

The reference and every comparison within a family share one fixed display scale. No individual option is resized to fit a trial.

W x H is the total visible bounding size in millimetres. Scale is relative to the preceding A4 version. All proportions and the 2x transformation factors are preserved.

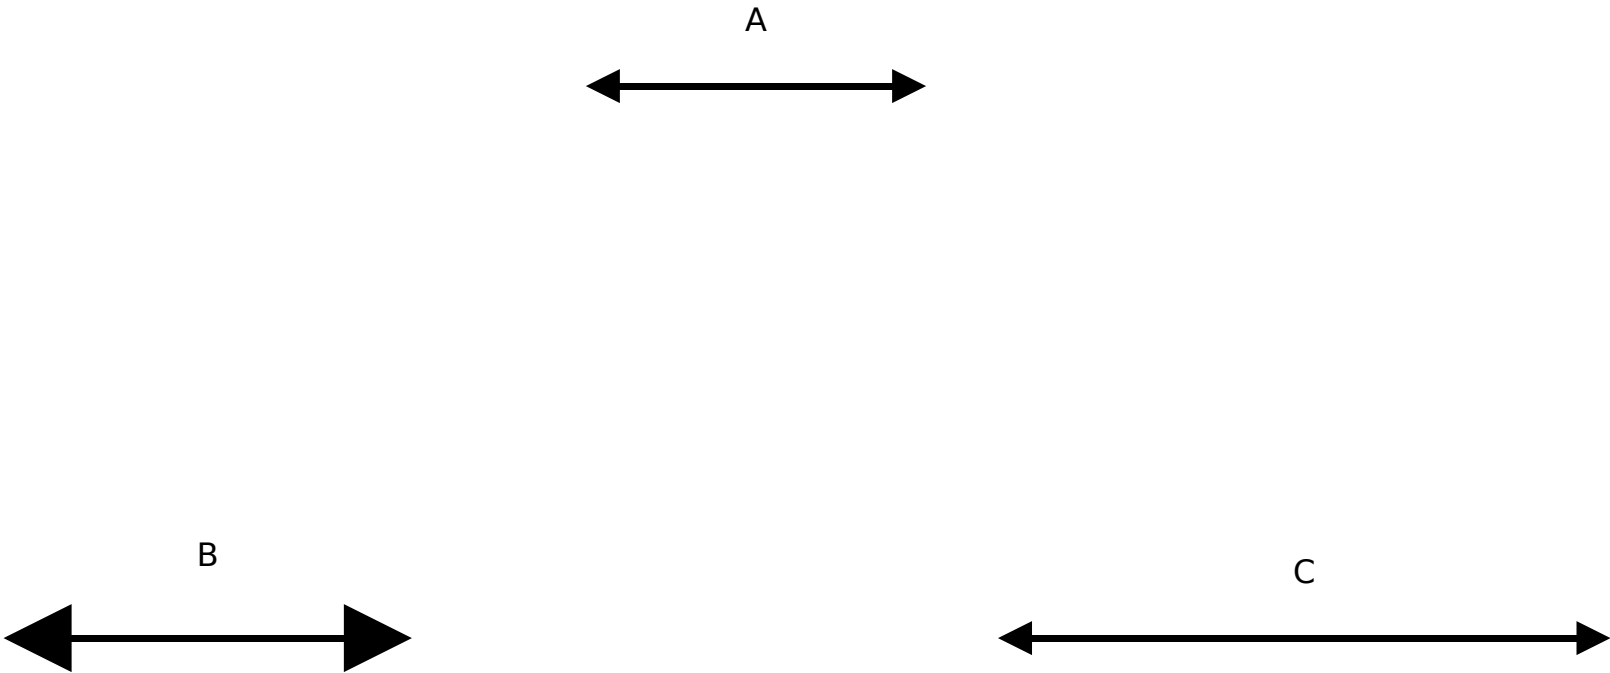

E = enlargement of the end components only; for colored segments and vertical end lines, E lengthens those components. L = extension of the main part. P = proportional enlargement of the whole reference.

Train L repeats windows: 14 in A, 28 in L, 14 in P. A/L window size is 1.8 x 1.2 mm, with 1.2 mm gaps. Rear projection, connector and locomotive stay fixed between A and L.

Centers, measured from the top-left page corner: A (148.5, 66), B (76, 139), C (221, 139) mm. Widest choice: 100.8 mm. Minimum horizontal gap between choices: 48.4 mm.

This is a layout proposal, not a perceptually validated optimum. Review it at the intended screen size. The measurements and rationale boxes are researcher annotations.
